

### REMARKS

This communication is in regards to the Final Office Action of December 18, 2008.

The Examiner has rejected claims 1-2 and 7-14 under 35 U.S.C. 103(a) as being unpatentable over by Eiref et al. (US 6,621,509), in view of Kamen et al. (US 6,421,067).

Applicant has amended claim 1 to clarify that the claimed invention deals with a three-dimensional image consisting essentially of two orthogonal display surfaces. That is, the claims have been amended to exclude cubes and polyhedrons, which have more than two display surfaces and which furthermore are rotated about a center of mass, not an axis between display surfaces.

Applicant has also added a new system claim 61 and a new computer readable claim 62 as system and computer readable medium counterparts to claim 1.

Placing the PVR on one surface and the EPG on the other orthogonal surface thus permits a user to change views from one surface to the other while still being able to maintain a contextual view of the other surface.

It is respectfully submitted that the amended claims adequately distinguish over the cited art of record. The Examiner has cited the cube of Eiref and the polyhedron of Kamen. However, the combination of references simply fails to disclose all of the elements and the functionality of the claimed invention.

In view of the foregoing, Applicant respectfully submits that no further impediments exist to the allowance of this application and, therefore, requests an indication of allowability. However, the Examiner is requested to call the undersigned if any questions or comments arise.

The Director is hereby authorized to charge any appropriate fees under 37 C.F.R. §§1.16, 1.17, and 1.21 that may be required by this paper, and to credit any overpayment, to Deposit Account No. 50-1283.

Dated: March 16, 2009
